

Long live the anti-imperialist resistance of Iran!

We denounce the military aggression of Yankee imperialism and its lackey Israel against the people of Iran. The attack violates the right of nations to self determination, international law, and even the own law of the Yankees.

What this so called liberation of the imperialists means for the masses was made clear early on with the bombing of the Shajareh Tayyebah girls' elementary school, massacring more than 170 people – most of them schoolgirls.

The people of Iran does not want Yankee bombs. Their future is for them to decide.

This leap in military aggression of Yankee imperialism against Iran, makes it beyond doubt that the main contradiction in the country is now between the oppressed nation of Iran against Yankee imperialism. The so called “popular uprising” against the regime that the Yankees were dreaming of, is nowhere in sight.

Iran is continuing making the Yankees pay for their aggression, taking control of the Strait of Hormuz, and dealing blows to the Yankees, causing a billion dollars worth of damage to military facilities, and putting partly Yankee owned gas production in Qatar out of order for 3-5 years

The reaction of rival imperialists from Russia, China, France, Germany, Finland, etc., despite their differing tones, consisted of hypocritical calls for respect for international law and for "peaceful solutions through diplomatic negotiations." All of this is aimed at undermining anti-imperialist resistance and forcing the attacked nation to capitulate.

The aggression we have seen this year, against Venezuela, Cuba and Iran, is not a sign of the strength of Yankee imperialism, but its weakness, they can no longer impose their will by simple military deterrence, but only by cannon fire.

Iran, under the Shah regime, was a US stronghold in the Middle East; but with the overthrowing of the Shah the US lost this stronghold; They now have their stronghold in Israel, but this is very small in comparison. So the Yankees dream to get back their stronghold, but their hopes of quick regime change, without ground invasion has failed, and they are stuck making various threats and spreading a narrative that there are talks and the so called Venezuelan way is still possible.

Despite all their back-tracking and talk of different military goals and so called great successes, it is clear that what they want and need is a regime change in Iran, and all other outcomes is a failure.

The people of Iran will show the Yankees that their dream is impossible, their country will never again be the stronghold of the Yankees.

Millions of masses in the Middle East, Asia, Europe, Latin America, and even within the United States itself are rising up in a new surge of anti-imperialist movements; wars of national liberation, resistance, and people's wars are erupting throughout the world midst the storm.

In this situation of growing imperialist aggression as well as growing popular struggle we uphold the call to found the international Anti-Imperialist League:

"The conditions are favorable for uniting the majority of the people against the imperialists and their lackeys. We call for the founding of an International Anti-Imperialist Organization, the International Anti-Imperialist League, to undertake the indispensable task of forming a world anti-imperialist front to advance along the path of unifying the majority of the people against imperialism and reaction, in service of the People's Wars, the national liberation struggles, and the proletarian and popular struggles throughout the world."

Yankees out of the Middle East!

Let's support the National Resistance War of the people of Iran!

Iran and Palestine will prevail!
